FLX001-A01A
Universal Remote Controller For All RoboRack™ & SafeSwitch™ Products
Release Date: 2020-2-1

DESCRIPTION:

Switchgear Safety's Flexitrol™ FLX001-A01A universal remote controller is used in conjunction with RoboRack™ application specific remote racking devices and SafeSwitch™ application specific remote switching devices to provide power and user control via a remote connection. Users can choose from wired or wireless operation, as well as other optional features depending on the site needs or application requirements. Each Flexitrol FLX001-A01A controller is compatible with all application specific devices offered by Switchgear Safety so you can guarantee that you always have the right controller for the job and you never have to worry about purchasing multiple controllers for multiple devices.

SPECIFICATIONS:

User Interface	5.7" full-color HMI with touchscreen & push-button controls, custom designed firmware, and immediate operational feedback.
Operation Distance	33' (10.0m) - 100 (30.0m) wired 300' (91.4m) wireless (*Optional*)
