Breaker Control Switch

Release Date: 2019-3-12

DESCRIPTION:

Switchgear Safety's™ new patented line of LOTO PRO™ temporary magnetic Lock-out/Tag-out (LOTO) products allow maintenance technicians to render control devices found on potentially dangerous equipment inoperable prior to work being performed. LOTO is a safety practice mandated by OSHA and used in industrial settings to ensure that dangerous equipment is properly shut off, isolated, or rendered inoperable prior to maintenance.

SPECIFICATIONS:

Weight	4.5lb (2.0kg)
Dimensions	6.75" x 3.0" x 4.5" (17.1cm x 7.6cm x 11.4cm)
Compatibility	ABB/BBC/ITE - C77; Allis Chalmers /Siemens/Siemens Allis - Type 210 ; Cutler Hammer/Eaton/Westinghouse - Type W, Type W-2; Electroswitch - Series 20, 24, 24P; Entrelec, Gave - U25; FPE - 80585; General Electric - SB-1, SB-9, SB-10, SBM; Instrument Transformer Inc - Series 95; Kraus & Naimer - C20; Shallco - Series 26)

ADVANTAGES:

- Compatible with all breaker control switch models
- Lockout control of potentially dangerous equipment
- Provisions for three LOTO devices (Locks, hasps, etc)
- Does not hinder use of remote operating equipment
- Simple to setup with zero required modifications
- Engaged, magnet requires over 100 lbf to remove
- Quick to install & remove from electrical equipment
- Zinc plated steel assembly for corrosion resistance
- Designed, manufactured, and assembled in the USA
