Push Button Pilot Device

Release Date: 2019-3-12

DESCRIPTION:

Switchgear Safety's™ new patented line of LOTO PRO™ temporary magnetic Lock-out/Tag-out (LOTO) products allow maintenance technicians to render control devices found on potentially dangerous equipment inoperable prior to work being performed. LOTO is a safety practice mandated by OSHA and used in industrial settings to ensure that dangerous equipment is properly shut off, isolated, or rendered inoperable prior to maintenance.

SPECIFICATIONS:

Weight	4.5lb (2.0kg)
Dimensions	5.0" x 2.25" x 4.5" (12.7cm x 5.7cm x 11.4cm)
Compatibility	All push button pilot devices, including those made by: ABB, Allen Bradley, Cutler Hammer, Eaton, General Electric, Rockwell Automation, Schneider, Square D, Siemens, Westinghouse, and more.

ADVANTAGES:

- Compatible with all push button pilot devices
- Lockout control of potentially dangerous equipment
- Provisions for three LOTO devices (Locks, hasps, etc)
- Does not hinder use of remote operating equipment
- Simple to setup with zero required modifications
- Engaged, magnet requires over 100 lbf to remove
- Quick to install & remove from electrical equipment
- Zinc plated steel assembly for corrosion resistance
- Designed, manufactured, and assembled in the USA
